

George Trushevskiy

Applied AI Engineer & Founder · Full-stack Products & Client Delivery

San Francisco · george@trusynth.com · +420 777 009 354

george.trusynth.com · github.com/gtrush03 · linkedin.com/in/georgy-trushevskiy

Founded TRU Synth to turn AI agents into working products, from native Mac software to cloud execution. Delivered JellyJelly's in-app agent with Venmo cofounder Iqram Magdon-Ismael. ESCP Management graduate and former six-person studio lead.

Experience

TRU Synth / Founder · Applied AI & product consulting 2024–present

Platform engineering — Built SynthOS, a 700k+ line AI platform with 500+ users across native macOS, web and cloud, including 326k lines of Swift. Unified agents, conversations, tasks, files and execution history.

JellyJelly consulting (New York City) — Built and operated JellyJelly's in-app agent with Venmo cofounder Iqram Magdon-Ismael, from the original integration to a hosted Node.js service. Handled 1,000+ daily requests and remains live on JellyJelly, connecting spoken requests, agents and browser workspaces to chat outputs with revisions, progress and cancellation.

Agent systems — Integrated Claude Code and Codex with user workspaces and browser execution. Built resumable sessions, SQLite execution journals and action receipts to inspect completed work and recover interrupted tasks.

Product delivery — Implemented identity, subscription billing, API integrations and task/file interfaces. Delivered 4,400+ commits across 12 codebases over 90 active development days in 2026.

Hackathons — ClawHack NYC prize winner (Greenroom). Built Oracle World Explorer (World Labs 3D + webcam web-slinging); presented at Betaworks NYC and AWS Builder Loft SF. 15+ NYC/SF hackathons.

TRU Graphics / Founder · Creative production Two years during ESCP

- Founded a Paris creative studio and led six designers across branding, 3D, motion and social campaigns, connecting client briefs, team direction and delivery while completing my degree.

[Selected client work](#)

Cognizant / Google-related content-safety project · Lisbon 2023–2024

- Worked in content-safety operations for a full year on a Google-related project.

Skills

Engineering — TypeScript, JavaScript, React, Node.js, Python, Swift / SwiftUI, SQL

Applied AI — LLM integrations, agent orchestration, MCP, tool calling, browser automation

Cloud & data — Cloudflare Workers, Docker, Vercel, PostgreSQL, Supabase, SQLite, Git

Delivery — Requirements scoping, API integration, prototyping, client delivery, team leadership

Languages — English (fluent), Czech (fluent), Russian (fluent)

Education

ESCP Business School 2021–2025

Bachelor in Management · Completed · Paris · Turin · Berlin · IB Diploma, English College Prague (2021)
